

# TOAD TIMES

The latest news from the Stop The Toad Team

July 2008

## The Countdown is on!

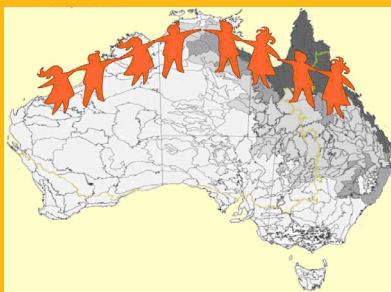

The Great Toad Muster, set to run from September 20<sup>th</sup> until October 18<sup>th</sup>, is less than 2 months away! We now have 60 volunteers signed up to help us remove cane toads from the front line, but we still need more! If you know anyone who might be interested in helping to protect WA's wildlife, tell them all about The Great Toad Muster or get them to contact Kim.

## The Wish List

With this years Great Toad Muster looking bigger and better than ever, STTF has a huge shopping list to ensure that the event runs as smooth as possible. Can YOU give, loan, discount or in some way help us access items on our Wish List? See our website for more details.

## National Eradication Week

STTF is calling all communities across the Top end to participate in National Cane Toad Eradication Week; from October 11<sup>th</sup> until October 19<sup>th</sup>. Imagine the possibility if we all have a go at removing cane toads from habitats, households and communities in the Northern Territory, Queensland and northern NSW. STTF commits to being the central repository of data – we will collate, analyse and report via the web and media, the daily tally of toads removed from the Australian countryside during the National Eradication week. If you can't make it to The Great Toad Muster, this is a great way to still be involved in reclaiming back Australia from the cane toad!

## Freaky Facts

- One cane toad in the NT survived in a dogs stomach for 40 minutes!
- Cane toads have no native predators in Australia
- 102 cane toads were imported to Australia in 1935; there are now roughly 200 million!
