Autumn 2009

Toads knocking on WA's door

In the light of news that a cane toad has been found on WA's border (February 27th), STTF are concerned that the resolve of the public, the government and its agencies should not waiver. This is a crucial period in the fight to hold back the tide. STTF believes that the battle to STOP THE TOAD should be maintained, particularly in the light of the success of our exclusion fencing methods. We may have lost the battle to keep cane toads from reaching the W.A. border, but we haven't given up on the war against them at all!

The Great Toad Muster 2009

STTF will be running its fourth annual Great Toad Muster from August to October this year (dates are yet to be confirmed). 2009's operation will be an expanded and ambitious effort. We aim to have 200-300 volunteers in the field from the W.A. border eastward into the Territory. This is a daunting exercise, but we are heartened by the support already pledged by the Federal Government, corporate sponsor ABN Foundation and our committed volunteers.

2008 Muster Volunteers

Fundraising for STTF

You don't have to come on The Great Toad Muster to join the fight against the toad. Why not help us do some fundraising? If you or anyone you know would like to plan a fundraising event or help out in any way, please contact Kim.

Freaky Facts

- Cane toads will eat anything that fits into their mouth—including seafood! The stomach contents of a cane toad recently caught in NSW revealed crabs and molluscs.
- Cane toads can be mistaken for Giant Burrowing Frogs.
