

# TOAD TIMES

The latest news from the Stop The Toad Team

Winter 2009

## Information evening for the 2009 Muster

The dates for the Muster have been set! September 12th until October 12th. STTF are holding an information evening on Monday 22nd June at 7pm at City West Lotteries House, West Perth. Come along to register for the Muster, ask those questions that you've been wanting to ask and meet volunteers from previous years.

## Spot the Wicked Van!

In conjunction with Wicked Campers, STTF is running a 'SPOT THE TOAD VAN' competition to win 7 days free camper-van hire.

To show their support of the cause, Wicked campers has designed a Stop the Toad camper van which can be hired out across Australia and encourages travelers to 'spread love, not cane toads' and to 'save our aussie icons'.

Over the next few months until September, anyone who spots the toad van can submit a photo of the van with a natural aussie icon, such as Ayers Rock, Purnululu National Park or a tropical Queensland beach. The best photo will win 7 days free hire from Wicked Camper Vans.

Wicked Campers has also offered to give those travelers attending this year's Muster a discounted hire rate. For more information, please contact Wicked Campers on [www.wickedcampers.com.au](http://www.wickedcampers.com.au) or 1800 24 68 69.

Email photo to [kim@stopthetoad.org.au](mailto:kim@stopthetoad.org.au). Winners announced September 1st 2009.

## Freaky Facts

Cane toads are native to Central and South America. The density of the cane toad within its native distribution is significantly lower than that of its introduced distribution. In South America, it is recorded at densities of 20 adults per 100 metres, but in Australia the density reaches 1,000–2,000 adults over the same area!
